

**Dirty areas and no latrines  
cause more flies.**

**Dirty faces and flies cause  
trachoma and blindness.**

**Trachoma causes blindness by turning eyelashes in the eye that rub on the eye (Trichiasis).**

**Stop trachoma!**

**Reduce the number of flies  
by keeping areas clean,  
building and using pit  
latrines.**

**Stop trachoma!**

**Always keep latrines covered  
and wash your hands after  
using the latrine.**

**Stop trachoma!**

**Face washing prevents  
trachoma and blindness.  
Wash your face and your  
children's face every day  
to stop flies in the eyes.**

**Only a little water is needed  
to keep your face clean.**

**Stop trachoma!**

**Go for eye treatment  
against trachoma at the  
nearest Health Clinic.**

**Taking treatment for  
trachoma without washing  
the face and using a latrine  
does not stop trachoma.**

**Stop blindness!**

**If you have eyelashes  
turned in the eye (Trichiasis)  
go for eye surgery during the  
surgical outreach.**

**This will stop you from  
becoming blind.**

**Keep your eyes healthy.**

**Filter your water.**

**Wash your face.**

**Use a latrine.**

**Go for eye treatment.**

**Stop trachoma!**

**Stop blindness!**

**Filter your water.  
Stop Guinea Worm now!**

# FILTER YOUR WATER
