

THE
CARTER CENTER

To Carter Center Supporter

For each of the past 19 years, Rosalynn and I have enjoyed a winter break with a select group of friends and supporters. Our 20th annual Winter Weekend vacation will be from March 7 - 11, 2012, and we invite you and your family to join us at Hotel del Coronado, in San Diego, California. The Winter Weekend vacation is important as it has netted over \$16 million, providing critical support to The Carter Center. These proceeds make it possible to continue our work now and into the future.

Our Winter Weekend is a relaxing event that gives guests the opportunity to participate in a wide array of activities. For Rosalynn and me, it is also a great time to enjoy several days with people who share our interest in global peace and health through the work of The Carter Center. The historic Hotel del Coronado offers quality accommodations, gourmet food, and great activities for our guests. Delta Air Lines, one of our official Winter Weekend sponsors, will provide a charter flight from Atlanta, Georgia, to San Diego, California, for the event. See enclosures for details.

During the event I look forward to sharing news of our accomplishments over the past year in both peace and health during our town hall meeting. There will also be a panel discussion focusing on activities around the Camp David Accords and its impact on the past 30 years. In addition, you'll have the opportunity to hear from Carter Center staff on a variety of our program activities and to explore San Diego points of interest.

We believe you will find the Winter Weekend a wonderful experience for you and your family, and I encourage you to consider attending in 2012. Please review the enclosed information about the trip and making your reservations. Rosalynn and I hope you will join us in wonderful southern California.

With our warm best wishes,

Sincerely,

A handwritten signature in blue ink that reads "Jimmy Carter". The signature is written in a cursive style with a long, sweeping underline that extends to the left.
