Panel I: Current Issues in Behavioral Health Workforce Policy

Moderator: Alex Ross, Sc.D.
Senior Advisor for Behavioral Health, Division of Nursing and Public Health Bureau of Health Workforce, Health Resources and Services Administration, U.S. Department of Health and Human Services
Panel I: Current Issues in Behavioral Health Workforce Policy

Panelists:

Glenda Wrenn, M.D., Director, Division of Behavioral Health, Satcher Health Leadership Institute, Morehouse School of Medicine

Paul Mackie, Ph.D., L.I.S.W., Professor, Minnesota State University

Andy Cummings, Consultant, Casey Family Programs

Angela Beck, Ph.D., M.P.H., Director, Behavioral Health Workforce Research Center
University of Michigan School of Public Health
Behavioral Health Workforce Policy:
Hope for the Urban Underserved

The 31st Annual Rosalynn Carter Symposium on Mental Health Policy

Solution Focused: Invest Upstream

★ Enable Engagement
  ✔ Meet people where they (already) are
  ✔ Meet them earlier

★ Multi-sector Partnerships
  ✔ Housing-Education-Justice
  ✔ Community Development Organizations

★ Advance Primary Care Integration

★ Transform Systems
  ✔ Trauma Informed Environments
Accelerating Diffusion of Innovation: Maloney’s 16% Rule

- Integrated
- Flexible Roles
- Coordinated
- Tech-enhanced
- Person-Centered
Artificial Turf?

★ Rethinking Roles
  Widen the Scope (of practice)
  Train Interprofessional Learners in Teams

★ Replace Volume with Value
  Align Resources with Need->Health Equity
  Allow Innovation- Scale with Policy
  Customize the Model-Agree on Outcomes
Vision: To ensure that all people have equitable access to behavioral health care and the opportunities to achieve optimal health outcomes.

Mission: Establish a national center for mental/behavioral health policy and research, provide thought leadership, and engage key stakeholders to advance mental and behavioral health equity.

Priority Impact Area: Develop a state behavioral health database to track, monitor, and support the analysis of behavioral health policies and their impact.
Integrated Care Leadership Program

From 2016-2017, participants at 20 selected clinical sites in Georgia will be **fully sponsored for all program activities** including:

- Structured monthly leadership and capacity-building activities
- In-person engagement with the ICLP training team
- Eligibility for **high impact innovation awards** with technical assistance for implementation of improvement projects.

Online-only participants will have access to the web-based program and receive mentorship and coaching from established integrated practices and integrated care experts.

ICLP launches January 11, 2016

Behavioral Health Workforce Policy Issues: A Rural Perspective

Paul Force-Emery Mackie, Ph.D., LISW
Professor of Social Work, Minnesota State University Mankato
&
President, National Association for Rural Mental Health

31st Annual Rosalynn Carter Symposium on Mental Health Policy
The Carter Center, Atlanta GA
November 12th, 2015
The Problem

- 60% of rural America underserved for behavioral health needs (New Freedom Commission on MH, 2003).

- 85%+ of US behavioral health shortage areas are rural (Bird, Dempsey, & Hartley, 2001).

- 90% of psychologists & psychiatrists and 80% of MSW social workers located urban (Mohatt, 2014).

- 65% of rural Americans get behavioral health care from primary care providers (Mohatt, 2014).

- Access to behavioral health services in rural too often limited or non-existent (Mackie, 2012).

- When access to rural behavioral health services is available, too often quality of care is less than typically accessible in more urban areas (Fortney, Rost, & Zhang, 1999).

- Rural access to specialized behavioral health care is limited, often non-existent (Wang et al., 2005).

- Stigma associated with accessing services continues to be a serious and pervasive challenge, which creates additional challenges for providers (Carter & Golant, 1998; Mackie, Zammit, & Alvarez, 2016; Mohatt et al., 2015).

- Hiring & retaining rural behavioral health practitioners continues to be a ongoing problem as identified by rural-based supervisors and hiring officials (Mackie & Lips, 2010).

- The use of tele-technology to “bridge the divide” - increase access - to behavioral health care continues to present challenges (Mackie, 2015).
Answering the “Why”

Several explanations have been posited, including:

- **Demographics**: Rural = 15-20% of total U.S. population,
- **Lower higher ed degree attainment** (rural = 18.5% bachelor’s and higher whereas urban = 32%) (Marre, 2014),
- **Lower higher ed degree attainment** = reduced pool of potential indigenous providers,
- Rural areas seen as less “viable” or “desired” places to practice due to limited access to resources, supervision, social & professional opportunities, dual relationships, general challenges associated with geographic isolation (Mackie & Simpson, 2007),
- **Burnout** in rural areas higher, or at least perceived higher among potential practitioners (Mackie, 2008),
- State & federal responses (e.g., National Health Service Corp, grants/scholarships, loan repayment programs). All respond to workforce needs, but lack long-term sustainability.
The Research

Research suggests rural behavioral health professionals are more likely to have grown up in a rural area & the further one moves from urbanized areas, the more difficult it is to hire rural behavioral health practitioners.

- For every 10 miles we move from an urban center, difficulty in hiring increases by 3%.
  - 30 miles = 10% more difficult
  - 115 miles = 35% more difficult
  - 180 miles = 54% more difficult

- Rural providers surveyed and interviewed - main reasons for practicing in rural:
  - They have rural roots (grew up where they are), want to be close to family/friends,
  - They have rural roots (but not from where they are), want to be in rural environment generally,
  - Understand rural culture and people, want to help others with similar background (familiarity),
  - See living rural as safer, more enriching, more “family” friendly, more aligned with personal values,
  - Generally more comfortable living rural than urban.

- Predictors to hiring and retaining rural providers based on the following three key elements:
  - Provider grew up in a rural area,
  - Provider education focused on rural concepts,
  - Provider completed internship in rural location.

Recommendations

Growing Our Own rural behavioral health providers – How:

- **Focus recruitment** in rural areas toward youth and **target** populations more likely to become rural behavioral health providers.
- **Create viable introductory pathways** beginning with entry-level positions that can lead to higher practitioner levels.
- **Develop advanced educational pathways** through collaborations with higher education institutions, includes:
  - Online & extended education, focused rural internships, and infusion of rural-focused knowledge, skills, & curriculum development.
- **Develop mentorship programs** to support rural practitioners,
- **Create funding opportunities** to support pathways concept,
  - Grants, scholarships, support for internships, educational advocacy, outreach.

The 31st Annual Rosalynn Carter Symposium on Mental Health Policy

November 12, 2015

Angela J. Beck, PhD, MPH
Director, Behavioral Health Workforce Research Center
University of Michigan School of Public Health
“A Workforce Crisis”

- Increased demand for behavioral health services
- Too few workers
- Poorly distributed workforce
- Need for additional training
- Emphasis on integrated care and treatment of co-occurring disorders
- Lack of systematic workforce data collection
Mission

To conduct research to help produce a behavioral health workforce of sufficient size and skill to meet the nation’s behavioral health needs
Partner Consortium

• National Council for Behavioral Health
• NAADAC, the Association for Addiction Professionals
• Community Partnership of Southern Arizona
• Southwest Michigan Behavioral Health
• National Association of State Alcohol and Drug Abuse Directors
• Association of State and Territorial Health Officials
• National Association of County and City Health Officials

Expert Work Group:
• Ron Manderscheid, PhD
• Peter Buerhaus, PhD, RN
• Ariel Linden, DrPH

Federal Partners:
• HRSA
• SAMHSA
Minimum Data Set

• Define the workforce

• Identify/evaluate data sources for an MDS

• Develop MDS

• Pilot test an MDS
Characteristics and Practice Settings

- Enhancing workforce diversity
- Service delivery for vulnerable and underserved populations
- Team-based care studies
- Core competencies for social workers
Scopes of Practice

- Analysis of state SOPs
- SOPs and professional responsibilities: social workers
- SOPs and professional responsibilities: paraprofessionals
- Billing restrictions that limit SOPs
